Grace Boyle Vice President Education

Welcome back everyone to the Learning and Teaching Awards 2022! We are here once again to celebrate of all our staff teams and academics, who work so hard each and every day to inspire excellence in enhancing the student experience at Ulster University.

What makes this night special is that it is totally student-led -- our Learning and Teaching Awards nominees have been voted for by our students. I'm pleased and delighted to say that almost 350 students have submitted nominations for this year's awards. I would like to personally thank all the students who have made tonight possible and congratulate every staff member and student rep who has been nominated.

The awards tonight act as our official thank you to everyone who have prioritised students and committed to go above and beyond - the real reward comes not from the awards presented tonight, but rather, from the incredible and touching stories that lie behind these nominations. This evening you

will see the testimonials in our online booklet. Whether it's the research supervisor who goes the extra mile to support their PhD researchers or the school office staff who have consistently demonstrated care and compassion-- the submissions give us a small insight into the student journey at Ulster.

The dedication which all of our staff prepared their teaching for a new kind of teaching delivery was extraordinary and because of this collective effort, students at Ulster University have brought their submissions for tonight to make their appreciation know. Congratulations and thank you -- you have helped to enrich the lives of the students and made a lasting impression to all those you have encountered in the past year!

As has been mentioned, these awards are truly student-led. All nominations were submitted by our students and a selection of Faculty and School Reps came together with UUSU staff to help make tonight happen. They are involved in developing the categories, promoting the awards amongst their peers, and most importantly, shortlisting the nominees for each category and deciding who the all-important winners are.

Finally, on behalf of the Students' Union and our membership, I would like to welcome you back and thank you for joining us tonight. Sit back, relax and enjoy the Learning & Teaching Awards 2022!

Professor Paul Bartholomew Vice-Chancellor

There is no escaping the fact that the last two years have been exceptionally difficult for everyone, not only across the University but across our society, as the pandemic took hold and all of our lives changed almost overnight.

One thing, however, did not change -- Ulster University's unwavering commitment to our students and making sure we do everything within our gift to deliver the best teaching experience and learning outcomes that we possibly can.

With government-imposed restrictions and lockdowns, we pivoted to almost exclusively online teaching and, as restrictions have relaxed, we have increasingly returned to on campus activity. This has required an incredible amount of work at all levels of the University and colleagues across the institution have worked diligently to minimise disruption, continue to deliver effective teaching, and maintain the academic integrity of our programmes.

Our dedicated staff have been central to this, and I am delighted that the Learning and Teaching Awards provide an opportunity to recognise the range of contributions made by colleagues that have supported, and continue to support, our students to achieve their full potential.

These awards are an important opportunity to celebrate our staff and students who are leading and delivering a culture of teaching excellence at Ulster University which has such a positive impact across all of our campuses and beyond, socially, economically and culturally.

Staff at Ulster University work tirelessly for their students, and there is no greater thank you than the one which comes from those they teach and support. Thank you to Owen and the

entire Officer and staff teams within UUSU for their continued support for these awards and for ensuring the entire process is truly student-led.

All of the nominees have shown remarkable commitment, compassion and enthusiasm for their subject, their work and their students. You are inspiring not only our students but the University community as whole and I thank you, most sincerely, for that.

Congratulations to you all.

Professor Odette Hutchinson PVC Academic Quality and Student Experience

Ulster University Student Union Learning and Teaching Awards make a wonderful and important contribution to UU's culture of excellence in learning and teaching. The LTAs highlight innovation and best practice in teaching, learning and the student experience and they celebrate examples of creativity and effectiveness within the curriculum and the broader student experience. The Awards highlight those experiences and contributions that have been truly valued by students.

The LTAs provide us with an important opportunity to recognise staff and to share recognition for outstanding contributions and impact. What is significant about the LTAs is that they are student-led -- from the nominations through to the decision-making panels. It is the student-led nature of the LTAs that without question, make both a nomination and award so special to staff.

Not only do the student led LTAs have a very special resonance with staff here at Ulster they are a powerful medium for the student voice and for showcasing innovation, best practice and what really works. This in turn informs our institutional enhancement processes enabling us to adopt these approaches and mainstream across our multiple campus locations, in order that all students can benefit.

At Ulster University we work in partnership with students to continually review and enhance the student experience in the pursuit of excellence. This year we have continued to build and strengthen our partnership working through the development of a new Student Charter which sets out our mutual commitments throughout the UU learning journey. Despite the challenges that 2021/22 has presented for staff and students, we have

succeeded in establishing a Student Voice Working Group this year. It is through this group comprised of students and staff that we are developing and enhancing opportunities for all students to take part in shaping the Ulster experience from supporting campus design, to curriculum design and sustainability projects. Enhancing the lived experience and outcomes for students is at the core of everything that we do.

I would like to take this opportunity to thank the student body and student union on behalf of staff for their diligence and enthusiasm in running the Awards, and for the positive impact they continue to have on our learning and teaching culture. Student engagement is fundamental to any institution's success and these awards represent a cornerstone of that engagement.
